Our Areas of Support

Get extensive support for non-core tasks and accelerate your business operations.

SUPPLY CHAIN

LOGISTICS

Tracking of Shipment and ETA Adjustment

With accurate shipment tracking service, businesses can have a holistic view of the shipment from warehouse to the destination. Based on the insights gained by tracking the shipment, we update and adjust the Estimated Time of Arrival (ETA).

Adjusting Far-East Orders in ERP

Far-East buyers send a request for the required quantity of products through ERP system. We maintain all the records and adjust the purchase orders based on prices, weight, quantity, and delivery date.

Transport Damage Management

We help in recovering the financial losses occurring due to damage to products during transportation. We collect the data about the products and damage from all the involved parties and submit it directly to the insurance provider.

Maintenance of Origin Data

We review product-related documents provided by the supplier and identify the country of origin accurately. In addition, we insert the origin data in ERP system that can be accessed for the future use.

Shipment Notifications

We send notifications about the arrival date of shipments to transporters. These notifications are sent through either email or a customer portal.

Freight Cost Management

We evaluate whether the invoices provided by freight forwarders are as per the conditions agreed. We track the prices in invoices and solve the discrepancies if there are any.

Along with these services, we provide a wide range of services to cater to your specific business requirements.
