## SUPPLY CHAIN

### PURCHASING

#### Dunning

We provide the dunning outsourcing service for requesting a quotation from the supplier, obtaining order confirmation, and taking follow-ups from the supplier to ship orders on time.

#### Order Confirmation

We compare whether the details mentioned in the Purchase Order (PO) sent to supplier and the Sales Order (SO) received from supplier match. If these details match, we confirm orders. If these details do not match, we coordinate with supplier and solve the discrepancies.

#### Quotation Entry

We compare the details mentioned in PO and SO. If these details match, we enter the verified quotations in ERP system. We also check each document thoroughly to ensure the supplier quoted the requested articles correctly.

#### Demand Analysis

We help businesses in estimating the demand for different articles and adjusting the stock availability to match that demand.

#### Material Requirement Planning (MRP)

We check the current inventory levels and determine the requirement of articles to meet the customer demand. Our team calculates the quantities based on demand, selects the suitable suppliers, negotiates the prices, and create contracts with suppliers.

#### Tracking of Deliveries

We track the shipment on the website of the transporter. We use the shipment tracking number to gain updates about each shipment and send the status to customers about the ETA.

#### Expediting

We collect the information about the expedited articles from open item reports, freight status reports, shipping documents, booking forms, and other sources. This information is updated in the ERP system.

Along with these services, we provide a wide range of services to cater to your specific business requirements.
