Get extensive support for non-core tasks and accelerate your business operations.

SUPPLY CHAIN

SALES OPERATIONS

Sales Order Booking

We support in validating and uploading the correct Sales Order (SO) documents in ERP system. We verify details in SO and upload the verified documents. Upon successful checking, we enter the order details, book the SO, and generate a SO number.

Backorder Processing

If the customer requested articles are not in stock, the given number of articles are added to the backorder. We enter the number of backorders in ERP system, track the availability of the stock, and send the updated status.

Customer Dashboards

We assist in maintaining customer dashboards to provide a general overview of the sales performance. We possess a suitable customer management software for every business that needs to gain a detailed view of the data related to their customers.

Along with these services, we provide a wide range of services to cater to your specific business requirements.
